

KIMOTO

Highly Weather-Resistant Shatterproof AGHC Film

KB-STICK™ S9U

*Protecting Your Display
from UV Light*

KB-STICK™ S9U

New shatterproof and anti-glare properties.

When applied to the glass surface of a display, this exceptional functional film reduces UV degradation.

Characteristics

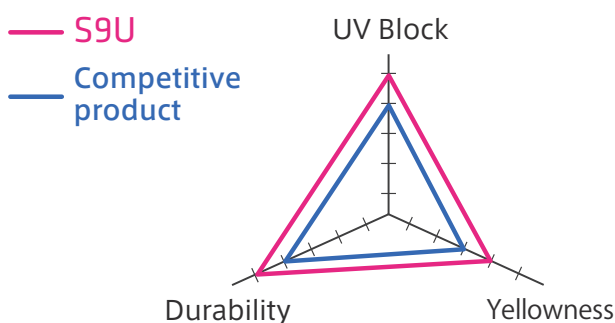

Weather-resistance
Durability (UV Block)
Image clarity
Yellowing resistance
Shatterproof

Structure

Anti Glare Hard Coat
PET (125um)
PSA -Acrylic-
Release Liner

Performance

Compared with products from other companies.

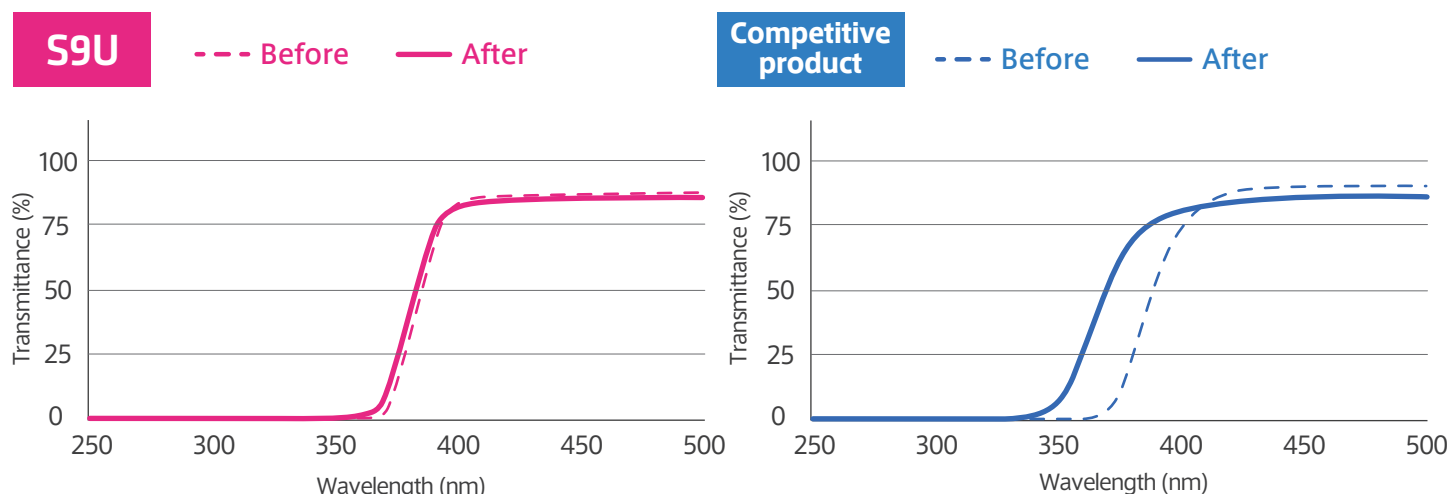

Optical Properties

Tt	90.2%
HAZE	5.0%
Clarity	91.4%
b*	1.2

* The values shown are measured values and are not guaranteed.

Spectral Transmissivity

No change in spectral transmissivity shown in weathering tests after S9U application.

Test Conditions

Apparatus : Atlas UV test
Fluorescent UV/Condensation Weathering Device
Lamps : UVA 340 x 8

Cycle : 4 hours UV and 4 hours condensation
Temperature : 60°C during UV cycle
50°C during condensation cycle
Total test hours 1,600
